

1. Who we are:

In the age of information technology development in Vietnam, Internet supplies information to people in the fastest and easiest manner. With stronger popularization of modern information technology system and higher demand on information technology access of consumers, trade business sector must promptly seize online marketing trend to look for potential customers for enterprises.

Seizing this demand, we established ESCO to meet website design demand of customers. With staff having more than 10 years of experience of website design, we have assisted a huge number of customers in positioning their brands and making a stable stand in online marketing development and business sector.

2. Why we are chosen:

With young, creative and dynamic graphic designers and web designers as well as experienced experts in website design and web application development on the Internet, we are proud to supply customers with high-class websites with professional design styles which impress visitors and improve competitiveness of websites as well as customers in advertisement on the Internet.

3. Working principle:

We listen, analyze and understand demand of each customers and apply our experience, skills and thinking to optimally settle such demand and assist enterprise owners in focusing on main business lines. Each customer is a part to contribute to build our value.

Each product is strictly tested to ensure operation on all web browsers, support website building on tablets and other high-class mobile devices. We fully set google tools, optimize seo, web and searching engine with permanent warranty policy and **24/7 Support** for website administration of customers.

c. SEO, Adword, brand positioning:

To supply the best marketing solutions to enterprises, combination of seo copywriting (contents building seo), keyword seo services, online marketing and brand PR.
